Criteria for Response Related Damages 28Sep2015.pdf  
OSR Acceptability for Bondad solid waste landfill.pdf

Hi Richard and Robert:

Incident command has proposed to the R8 RICT and HQ OEM to perform some limited repair to response related damages to address sediment deposition in low flow residential areas. David Ostrander referred me to you and HQ OEM wanted me to reach out to you on this.

Attached is a more detailed rationale and criteria for the specific cases in which we feel it's justified to perform this repair.

We recognize the presence setting aspects of this proposed action and that it may impact downstream areas in R6 and R9. We are reaching out to R6 and R9 for their comments. HQ OEM was also going to consult with OGC I believe.

There is a limited timeframe of the next 2-3 weeks to perform these repairs this construction season due to the normal onset of winter weather.

Dave Ostrander is going to bring this up at the R8 Management Meeting on Thursday.

I'd be happy to discuss this on the phone, thanks for your consideration,

Mike
